

COVID19 Updated Response

As you are aware the situation over the Corona Virus 19 is rapidly changing. The recommendations seem to be updated almost hourly. Our priority is your safety and well-being. Drs. Wilson and Cruz have been closely monitoring the recommendations and accessing how we can best care for our patients without risking further spread and exposure.

At this point we will not offer any allergy shots on Monday morning March 23rd. We are not yet sure if we will be open for shots on Monday afternoon. We ask that you check our Facebook page for updates and call before coming for shots to be sure that we are administering them.

Note we may have to modify our process of giving shots to ensure safe practices of social distancing. We thank you for your cooperation in advance.

We may also need to adjust our schedule for appointments with our providers from time to time. We ask for your understanding if your appointment has to be temporarily cancelled.

To better serve you and keep everyone well we ask that if possible when coming to office visits or for allergy shots to please limit the number of people you bring with you. If possible, it would be best for only the patient (if an adult) or the patient and one parent/legal guardian (for all minors) to be present. Also, if there is any chance that you or anyone with you could be ill or have been exposed to someone that is ill (including those that have been traveling or on a cruise) please DO NOT COME IN. Call us so we can assess whether it is safe for you and the practice to come in.

Rest assured that we will continue to maintain office cleanliness including additional wipe downs of common touch areas. And our staff is also under strict guidelines regarding exposure and when to stay home.

Please know we are working hard to get through this time as best we can. Let's work together to "flatten the curve" and do our part to stop the spread. Thank you!
